

THE TELEPHONE CITY CRYSTAL

BRANTFORD LAPIDARY & MINERAL SOCIETY

Happy Valentines Day

February 2019
VOLUME 91 Issue 1

DATE: Friday, February 15, 2019
TIME: 7:30 pm
LOCATION: TB COSTAIN/S.C. JOHNSON COMMUNITY CENTER, 16 MORRELL ST. BRANTFORD, ON

PROGRAM SPEAKER: George Lavorato
TOPIC: Mosaics

George will be talking about the use of stone in Mosaics and how this has been applied to art & decorations. George will start with prehistoric references about 100,000 BC bringing it into the neo-lithic and then the great cultures of Egypt Greece and Rome. He will discuss how Mosaics is a permanent art form. He will talk of the Renaissance where the art form of Commesso was developed by the Medici. He will compare the Indian/Moghul and Byzantine forms and style. He will discuss how marble developed into a decorative industry. George will mention how technology with computers and water abrasive cutting technologies have made Stone Art Pietra Dura available to all, although it is quite expensive. Finally, George will talk about Pebble Mosaics as Stone Art that can be created at home or as part of a Community Project.

Letter and Notice of Motion

November 7, 2018

Brantford Lapidary and Mineral Society cc BLMS Membership Executive

Please consider the following notice of motion for approval at a BLMS general meeting or annual general meeting.

Notice of Motion

Our motion is “to limit the release of Society funds without BLMS membership acceptance at a general monthly meeting if the single expense will exceed 5 thousand dollars (\$5,000). This shall include expenditures for the following: workshop annual rental or workshop equipment or workshop expenses (i.e. utilities), annual show rental or Society donations or any functions associated with the Societies general operations.”

If the motion is accepted, we request that it is included in the bylaw Articles at the next constitution and bylaw revision.

Thank you for your consideration

Roger and Kathy Campbell

Valentine's Day Is Coming Soon.

VOLUNTEERS NEEDED - MESSAGE FROM ROBERT PARRY REGARDING THE 2019 PARIS GEM & MINERAL SHOW

Well it is almost that time of the year again when we have to start preparing for the 2019 Show. This is the big money maker for the club. It is more important this year to have a successful show as the profits are needed to financially support the "workshop":

To make it all work, we need volunteers. There are many jobs to fill, so please consider signing up to help with the jobs listed below. The sign-up sheets will be available at the February meeting and every meeting until the show.

VOLUNTEER REQUIREMENTS:

- **Admission Table** – to collect money and make change at the door. Need a minimum of a two-hour stint.
- **Auction Table** – to help organize and put out items for the silent auction during the show.
- **Club Table** – to hand out info about the "club" to promote and collect memberships and sell workshop punch cards.
- **Signs** – to set out road signs on the Monday before the show and to collect them at the end of the show. Also, to have someone put up signs in the building before the show and to put them away at the end.
- **Internet** - to promote the show on Facebook and Instagram and run contests before the show.
- **Kid's sandbox** – to set up and help run this children's activity during the show. Also, to help prepare the bags for sale before the show.
- **Fluorescent Display** – to help set up and man the display during the show and to help put it all away at the end.
- **Security** – to wear a "security" shirt during the show in order to help curb theft.
- **Volunteers "at large"** - to help with set up on Friday night and with tear down on Sunday

Whether you can volunteer a little or a lot, it all is greatly appreciated. Thank you, Robert Parry

MINERAL OF THE MONTH: Our 2019 Paris Gem & Mineral Show is featuring “Birthstones of the Year”. Each month in 2019 our Newsletter “Mineral of the Month” will be “Alternative Gem Stone” instead of “Birthstone”. February’s “Alternative Gem Stone” is: “Onyx”.

The Gemstone Onyx

Onyx is a gemstone whose description can have several connotations. Its most accepted gemstone definition describes a solid black [Chalcedony](#), or a [banded](#) or layered black and white Chalcedony. The term Onyx is occasionally used to described any engraved stone with a solid color base, or it may describe any banded gemstone with parallel banding. In its solid black form, Onyx is the most traditional black gemstone.

Chemical Formula	SiO ₂
Color	White, Black, Banded
Hardness	7
Crystal System	Hexagonal
Refractive Index	1.54 - 1.55
SG	2.63 - 2.65
Transparency	Translucent to opaque
Double Refraction	.009

Luster	Vitreous
Cleavage	Indiscernible
Mineral Class	Quartz (Chalcedony)

ALL ABOUT

Onyx is an ancient gemstone, having been used in jewelry and as an ornamental gemstone for carvings since antiquity. Onyx has traditionally been one of the most important engraving and cameo gemstones, where its most common form was a black base with a white upper layer. Although still used a minor gemstone today, the significance and value of Onyx has been diminished as compared to ancient times.

When Onyx is banded black and white, it can be jointly classified as both Agate and Onyx. However, many require Onyx to have banding in roughly parallel lines, whereas other forms of Agate can have wavy or concentric forms of banding.

USES

Onyx is usually cut into cabochons and beads, where it is mostly used in bracelets, necklaces, earrings, and rings. It is also an important cameo and intaglio stone, and carvings and small statues have also been cut from it.

VARIETIES

- **Black Onyx** - Solid black form of Onyx.
- **Onyx Agate** - Banded variety of Onyx/Agate with parallel bands of black and white.

FALSE NAMES

Limestone Onyx, Mexican Onyx, or Onyx Marble - Travertine or Tufa that exhibits color banding from layer deposition. This material can be polished and dyed and used as an ornamental stone.

Green Onyx - Often refers to Chalcedony dyed a deep green color; may also refer to Agate banded light green and white. Sometimes also incorrectly used to describe green Onyx Marble (above).

Onyx Opal - Banded, dark colored Opal.

Rhodochrosite Onyx - Banded variety of Rhodochrosite (*Rosinca*).

Onyx TREATMENTS AND ENHANCEMENTS

Black Onyx is often dyed. The banded white and black form is usually natural and not dyed.

Onyx SOURCES

Sources of Onyx include India, Brazil, and Uruguay.

SIMILAR GEMSTONES

Black Onyx can be similar to **Black Diamond**, though it is much softer and less lustrous. It is much harder than **Jet**. Black Onyx lacks the metallic luster of **Hematite**, but it can be very difficult to distinguish from **Melanite Garnet** and **Schorl Tourmaline**.
